

Welcome to our MCC Children's Center. Currently, we are enrolling for our preschool rooms. Our two classrooms serve your 3, 4 and 5 -year old children. Our NAEYC accredited program focuses on play-based learning, using children's interests and quality learning materials. Using cognitive, socio-emotional, and fine/large motor development, teachers are able to build an emergent curriculum that ignites children's learning. Our indoor and outdoor learning environments motivates our little learners.

Why us? What makes us different? Most importantly, our program is NAEYC accredited, which means we take our high standards seriously. When you come to take tour, one will notice the high quality materials. Secondly, the teachers hold Bachelor's and Master's degrees. Having higher degrees allows teachers to learn right along with our families and children. We get to know your child and the individual cultural backgrounds. Finally, the low-cost tuition will not compare with the current high cost preschools. As a parent recently mentioned, we are a hidden gem in the day care desert!

Full tuition scholarships for your children's care/education are available through the statewide Quality First: First Things First Program.

If you would like to call for a tour or more information, please reach out by calling 480-461-7757
