MESA, Ariz -- Halloween conjures up all kinds of scary fun. Americans will spend nearly \$7,000,000,000 on Halloween costumes and masks, but it's the tiny little monsters living on those masks that is enough to make anyone scream.

"In terms of gross, it's definitely kind of disgusting looking at this data," says Dr. Stan Kikkert, who heads up the Bio-Technology program at Mesa Community College. Even he was alarmed to see the results of our 3 On Your Side undercover investigation.
