

Astronaut to talk about work

MESA — Mesa Community College's "NASA Destination Station: Experiences in Orbit" will host astronaut Cady Coleman, who will discuss her work on the International Space Station.

At 7 p.m. Thursday, Coleman will discuss her 4,330 hours in space aboard the space shuttle Columbia and the International Space Station.

She spent 159 days aboard the space station.

In addition to performing science experiments and space-station system maintenance, she acted as the lead robotics and science officer.

The presentation will be in the event tent on the eastern side of the campus, which is at Southern Avenue and Dobson Road.
